Curriculum Vitae

October 2015

The fundamentals of my activities are my completed educations as ecologist, business economist, process & green technology.

So far I was working very successful as consultant (economy/ technology), project manager, head of commissioning or energy manager for the benefit of enterprises and townships. So they got without a problem the following international certificates. But we also passed the annual re-audits easily.

- ❖ ISO 9001 (quality management)
- ❖ ISO 14001 (environmental management), EMAS (europ. EMS Certificate)
- ❖ ISO 50001 (energy (efficiency) management)

Additional I am an expert for

- ❖ Renewable fuels and gases
- ❖ „Black-, Grey- and Clear-Water-Systems“: sewage recycling systems, biolog. sewage recycling systems
- ❖ „Solar-Heating-Systems“ incl. „Solar Heating With Ice“
- ❖ “Vertical Wind Power Stations”
- ❖ Management of basic recycling and waste materials

The size of my projects was between 100.000.-€ and 20 Mio. €, was operating with 5 up to 130 persons in Latin America, Europe, Middle East and the Arabian Peninsula (Qatar, Saudi Arabia).

Career path (inverse order):

- **07/2013 – today: Freelance Executive Consultant, Project manager**
 - Consultant for companies and municipalities by consideration of several social and economic aspects
 - for “Energy- & Environmental-Management-Systems ISO14001, EMAS,ISO 50000;
 - Creation of scientific feasibility studies about alternative energy and water recycling sites;
 - Expert about “„Black-, Grey- and Clear-Water-Systems“,
 - Creation, construction and PM of small organic sewage treatment plants;
 - “Solar-Heating-With-Ice”; Solar-Thermic-Sites”,
 - “Vertical-Wind-Power-Stations” and other “renewable energy sources”
 - Coach and Trainer for Companies and Municipalities about “Feedstock- and Waste-Management”
 - **10/2014 - 06/2015 techn. Projectmanager for HYDRO-POWER-AUSTRIA (Austria/Colombia)**
of small Hydroelectric-Power-Station in a precast-concrete-parts-method; Management, reaction construction and control of the static calculations. Finished before realisation although the project was ready because of financial problems of the clients
- **Latest news: successful upgrade “AUDITOR for ENERGY EFFICIENCY by DIN EN ISO 50001 and DIN EN 16247”**
- **04/2013 – 06/2013: Freelancer for HAYS as Precommissioning-Technician for LINDE SAUDI ARABIA** in Al Jubail; member of the successful Commissioning-Management-Team for an Acetylen production Site; duties very similar to Qatar
- **05/2012 – 03/2013: Freelance Executive Consultant** (see above)

- **05/2011 – 04/2012: Freelancer for the UHDE-THYSSEN-KRUPP QATAR;**
 - Pre-Commissioning and Commissioning in Messaid, Qatar; member of the Commissioning-Management-Team:
 - Author of new and check of existing operating procedures for the cold and hot commissioning
 - Coordination and supervision of 10 groups of 20-25 pers. (formans and operators),
 - Coordination of the several subcontractors companies for cold- and hot commissioning
 - Daily construction quality-check (lines, pipes, tanks, stages, operating areas, pumps etc.)
 - Check of all pipes (water, compressed air & steam), cleaning and filling with inert gas for conservation
 - Check of the function of all electric components and lines, marking and preparation of all checked lines
 - Check of all fittings, pumps (rotation check), engines and systems
 - Coordination and execution of all test runs, department by department.
 - Coordination of trainings of operators and technicians
 - Systematic combination of the several checked systems to a whole working site.
 - Coordination of the final inspection, as well as the creation and handover of the documentations
 - **03/2011 – 05/2011: Freelancer, Executive Consultant & Project manager** (see above)
 - **07/2010 – 03/2011: CEO for ENERGIA SYSTEM TECHNOLOGIES Ltd., consecutively ENERGY-SYSTEMS E.A.S.Y. LLC**
 - Prokura and head of projects for:
 - EASY-SYSTEM-BOX (cost reduction by a very effective illumination technology)
 - recuperative heat exchanger
 - Solar-Thermic heating and/or cooling
 - Vertical Wind-Power-Stations
- Separation due to serious problems of employment and business law, finally regulation by a judge in court
- **01/2005- 06/2010: Freelancer, Executive Consultant & Project manager** (see above)
 - **04/2009-11/2009: VAOS (Value Added Oilfield Services) LIBYA; I was hired as head of department for environmental- and infrastructure.** The VAOS company was also dealing with the following items:
 - "ATC-Automated Tank Cleaning" (of crude oil tanks),
 - "Waste-Oil-Pit Treatment" by "Bio-Remediation" (a biological remediation method by mikrobaerias)
 - Ecological Energy-, Waste- & Sewage treatment and principal management for several camps
 - "Water-Supply & Management" and "Water Recycling" for several camps
 - **09/2007-11/2008: Bio Diesel International AG** Manager of Commissioning; mainly in Spain
 - Duties and functions nearly ident with the commissioning part for BDT, Project volume about 80-200 mio €
 - **01/2005-08/2007: Bio Diesel Technologies GmbH**
 - **member of the research and development team** of a modular biodiesel-site-system, one unit can do the production of 1000 litres of biodiesel per our, (at least 4000 liters)
 - Manager of Commissioning, and technical Project Manager in: Slovakia, Cyprus, Bulgaria, Spain, Poland, Greece
 - Manager of Commissioning, and technical Project Manager in: overseas (Argentina, Uruguay, Brazil);

As the technical project manager I used to organize a project with my own scheme:

 - Project opening with client, head of management of BDT and the commercial PM
 - Consulting of each client for his perfect infrastructure for the modular Bio-Biesel-Units
 - Writing down and checking of the "Project -Management-Book" (project targets, project process steps, time management, base-line time-sheet)
 - Creation of the several corrective actions in advance by expected plan variances
 - Control of the project progress and enabling the direct connected payment procedures
 - Coordination of the several subcontractors companies for cold- and hot commissioning
 - Coordination of the commissioning process
 - Coordination and execution of the trainings for the operators, technicians and chem. staff (Engl. and or Span.)
 - Coordination and control of the final inspection (incl. a 48 hour test run)
 - Coordination and control of the project, process and final documentation for the client
 - "Project-Handover" to the client and the future staff
 - Claim Management & Feedback to the construction team and quality control of the project itself
 - **06/2001-12/2004: Freelance Executive Consultant, Project Manager;** (see above) also seminars in Germany and USA
 - **10/99-05/2001: Peithner KG nm. Peithner Austroplant GmbH; Environment- and Quality Manager:**
 - Project manager of a successful implementation of the environment management systems ISO14000 and EMAS, energy-/ resource-balance sheet,
 - **Gaining the award by the government of Vienna "Eco-Business-plan 2000"**
